

20th year: Analysing non-performance risk in structured commodity trade finance

7, 8 & 9 July 2020

HMS Belfast, London

Three-day training course - with totally revised content
led by John MacNamara, Carshalton Commodities

CC

www.structuredcommoditytradefinance.com

2020 training totally revised

- Fully understand the impact of different lending rationales and the prospects of repayment
- Understand how structures came about, what they can achieve, and what they don't do
- Horses for courses: deep dives into different structures, how they work, where they might best be applied, where they might be less reliable, and the variations on the central themes
- How 'best practice' comes from experience, and experience is generally learnt from bad practice
- How to assess term sheets and negotiate on facility documentation
- How to use insurance and other risk mitigants in the SCTF context
- Identify opportunity, while observing the "dos and don'ts" in both emerging and developed markets
- Understand the lessons of the global financial crisis, and the 2015-17 commodity price collapse – how did trade-related structures hold up?
- Full risk assessment : how do SCTF perform against other classes of creditor in modern restructurings of borrowers with multiple debt categories.
- Opportunity & Threat: Basel 2, 3 and 4, & the impact of the latest regulatory developments
- Learn to argue : beware the 'wrong lessons' from different cases

About John MacNamara

John MacNamara ("Mac") is CEO of Carshalton Commodities. For 20 years until 2019 he was Global Head of Structured Commodity Trade Finance at Deutsche Bank AG, first in Amsterdam and then in London, finishing as Vice-Chairman Trade Finance, Commodities. He chaired DB's 'Commodity Trade Finance Council' which was a technical review body of all DB's commodity trade finance facilities, and was responsible for all commodity-backed financing across both developed and emerging markets. Prior to setting up the multiple award-winning business at Deutsche, Mac set up the structured trade & commodity finance business at Santander in London, and has worked for international banks and commodity traders since 1982. His first structured deal was already in 1983, between the USSR and Colombia, financed by an Islamic commodity fund. Mac's publications include the STCF chapter in the Loan Market Association (LMA)'s 2016 textbook '20 Years in Loan Markets' which includes product definitions for the main structures, also the PXF chapter in the LMA's 2013 textbook 'Developing Loan Markets', also his own 2001 textbook 'Structured Trade & Commodity Finance in Emerging Markets: What can go wrong?', plus he contributed a large part of 'Financiación estructurada del comercio exterior' – a guide written for the Spanish exporters' institution ICEX. For the last 7 years he has been sitting on the LMA's commodity finance working party, which produced the PXF template in 2013 and which recently has been working on a new template for BBF, and also on the steering committee for UNCTAD's Global Commodities Forum, also on the editorial advisory boards on 'Global Trade Review' (GTR) and 'Trade & Forfeiting Review'.

In 2019 GTR conferred their first ever 'Legend in Trade' award on Mac, while TXF gave him an award 'For Outstanding Services to Commodities Finance'. Mac has an MA from Cambridge University and a Green Beret from the Royal Marines Commandos.
